Available on request

PROFILE

I'm a full-stack software developer with a strong foundation in problem solving and a pragmatic, delivery focused mindset. For the past four years I've worked professionally in the UK as a software developer, building and modernising enterprise web applications and APIs in financial services environments, turning real business requirements into reliable, well-designed software.

WORK EXPERIENCE

Scott Logic, United Kingdom

2021 - 2025

Software Developer

May 2023 - Nov 2025

Associate Software Developer

May 2022 - Apr 2023

Graduate Software Developer

Nov 2021 - Apr 2022

- Consultant software developer embedded in client agile teams within the financial services sector
- Designed, built, and modernised enterprise web applications, REST APIs, and data processing systems
- Delivered features end to end, from requirements and planning through development, testing, and production release, working closely with engineers and business stakeholders
- Improved performance, reliability, and maintainability of critical systems through optimisation and modernisation work

Durham University, United Kingdom

Jun - Sep 2019

Summer Studentship

- Built a Python-based particle simulation to model molecular behaviour at solid-liquid interfaces
- Architected the core physics engine and data model underpinning the simulation
- Delivered a desktop application by designing and implementing a PyQt-based GUI

EDUCATION

Master In Science (MSci)

2017-2019

Durham University, United Kingdom

First Class (Honours)

CERTIFICATES

Oracle Certified Associate, Java SE 8 Programmer

Aug 2024

Oracle
